

Dana Research Group

Fundamental and Applied Chemical Kinetics

is **SEARCHING**
for candidates

TECHNION
Israel Institute
of Technology

A new theoretical and experimental chemical kinetics research group at the Department of Chemical Engineering, Technion, led by Dr. Alon Grinberg Dana, is looking for:

- **Outstanding Undergraduate Students for Research Projects**
- **Outstanding Graduate Students (PhD, MSc)**
- **Outstanding Postdoctoral Candidates**

To participate in the development of new simulation technology solving practical problems in the cross-roads of Chemical Engineering and Applied Energy Research.

We develop cutting-edge automated molecular scientific software, and validate our predictions using state-of-the-art experimental setups.
