Call for Proposals 2023/24

GTEP support for scientific papers, published in leading scientific journals in the field of energy

In order to encourage the publication of scientific papers in the field of energy in the world's leading scientific journals, the Grand Technion Energy Program (GTEP) offers a special financial support to researchers in order to encourage GTEP's community to publish their work in high impact factor journals.

The special support in the 2023/24 academic year is as follows:

Up to USD 3,000 (incl. VAT) for a scientific paper published in a journal which its IF > 10;
or up to USD 6,000 (incl. VAT) for a scientific paper published in a journal which its IF > 20;

It is a one-time grant per researcher, per year (if it is a collaboration of more than one Technion PI, the grant will be divided between the PI's).

The papers should comply with **all** the following criteria:

1. The subject of the scientific paper is related to the field of energy.
2. The scientific paper was published in a journal which its Impact Factor is at least 10 and is clearly a leader in its field.
3. The scientific paper mentions the Grand Technion Energy Program in the acknowledgements section.
4. The researcher's affiliation in the scientific paper is listed as (also) the Grand Technion Energy Program.

Grant management procedures will follow standard Technion's EVPR (Manlam) funds protocol.

The continuation of the funding in this track in future years will be considered according to the resources of the Grand Technion Energy Program.

Applications can be submitted throughout the year. Please include a copy of the scientific paper with your application.
Applications should be submitted by email to the GTEP office: galitk@technion.ac.il

Sincerely,

Prof. Dario R. Dekel
Director, Grand Technion Energy Program
